compliant systems*

*Maintainable systems for
the life of the vessel*

*More than 30 years
experience in marine
refrigeration systems*

*Newlyme can upgrade,
repair or replace your
existing system*

Solid and reliable systems

USDA & PPECB COMPLIANT REFRIGERATION SYSTEMS

When the refrigeration system on your vessel has become obsolete or unserviceable and no longer meets the requirements of **USDA or PPECB**, Newlyme can replace or upgrade your current system. Whether you are looking for a new system or a refit of your existing system we can provide a solution to your exact requirements to offer your vessel economic continuity.

We will use existing sensors, actuators, cabling and enclosures where possible to keep the costs low and minimise installation time. Systems are tailor-made to be installed easily, with as little disturbance as possible to the overall running of your vessel.

CUSTOMERS WE HAVE SERVED

BP * Blue Star * Carrier Transicold * Cunard
Dobson Fleet Management * Geest * Holy House Shipping
London Ship Management * Norbulk * P & O Ferries /
